

# NGUYEN THI NGOC TRAM

**Address:** Thu Duc, Ho Chi Minh City
**Phone:** 0398117422
**Email:** ngoctramngff4@gmail.com
**Github:** https://github.com/tramvirtualis

## PROFESSIONAL SUMMARY

Final-year Software Engineering student who has completed the Bachelor of Information Technology program. Possess a solid foundation in OOP, APIs, and software development processes, with experience developing projects using Java, Spring Boot, and ReactJS. Able to leverage AI tools effectively and quickly adapt to new technologies. Seeking a Developer position to apply my knowledge, gain practical experience, and continuously develop my technical skills.

## EDUCATION & CERTIFICATION

**Ho Chi Minh City University of Technology and Engineering | 2022-2026**
Information Technology
GPA: 3.14/4.0
**TOEIC Listening & Reading: 825/990**

## PROJECT

### CINESMART - MOVIE TICKET BOOKING WEBSITE | 2026

**Team size:** https://github.com/tramvirtualis/Cinesmart

**Overview:** Cinesmart is an online movie ticket booking website that provides essential features including ticket booking, online payment, promotions, a chatbot for customer support, a 360-degree virtual view for seat selection, and cinema management. The platform features a modern, user-friendly interface.

**Techology:** ReactJS, Tailwind CSS, Spring Boot, Spring Security, MySQL, n8n, Marzipano, Blender, Render, Railway, Vercel.

**Key Contributions:**

- Built and integrated AI assistant using n8n, with chat persistence, secured agent tool APIs.
- Implemented core booking and payment flows from movie and showtime selection through checkout, integrating ZaloPay with order creation, payment callbacks, and ticket/QR display.
- Delivered real-time seat selection with WebSocket to keep seat availability in sync across clients and reduce double-booking under concurrent load.
- Developed loyalty and promotion features including Silver/Gold/Platinum tiers, tier-scoped vouchers, and voucher redemption in checkout.
- Enhanced the customer experience with movie recommendations, multi-cinema schedules, food combos with tickets, reviews, and favorites.
- Supported admin and manager workflows through analytics dashboards, CRUD for movies, showtimes, cinemas, and pricing, banner management, and data export.
